

Stone- and sorting SG32

Grapple 10-20 ton

Steelwrist Powered Work Tools – Stone and sorting grapple

Heavy duty sorting grapple

The new high-performance sorting grapples are targeted for the tougher tasks such as handling large stones, timber, recycling, scrap, sorting and also for medium duty demolition work.

The tip-to-tip closing cutting edges in HB500 steel are bolt-on and turnable, which together with the high tensile steel jaws and expander pins assures a cost effective operation.

High clamping force and a super wide opening will give you the flexibility that you need.

Shimable mechanical end stops and load holding valves ensure a safe work.

The bracket has a 5° angle that levels the grapple with the tiltrotator rotation plane and works great with our SQ-technology.

Technical specification

Article

Machine weight (tonnes) 10-20

Gripper area, m2 0,32

Gripper opening tolerance (mm) 1830

Compaction area (kg) 7000

Weight (kg) 480

Gripper force, tip against tip, kN 20

Height, tip against tip 1010

Height, max open 863

Max operating pressure (bar) 250

Bracket S40, S45, S50, HS08
