

SVAB L8 joysticks

Steering system

As an alternative to Steelwrist XControl joystick we also provide SVAB L8 handles that choice. The hand rest is basically the same between SVAB L8 and XControl. Together, these two are the leading joysticks in the market.

When should I choose SVAB L8 and when Steelwrist XControl? Both joysticks have excellent ergonomics and share the same components. Generally one can say that if you have rather small hands then L8 will fit you better and if you have larger hands then you will likely be happier with XControl joysticks.
